

**GOODWILL  
AMBASSADOR  
PROGRAMME**

Cardiff Sixth Form College  
Goodwill Ambassador Programme

## A Proven Formula for Success...

For over 4 years, our Goodwill Ambassador Programme has provided an exceptional balance of academic study and extra curricular activities. Students have the opportunity to experience international exposure in their chosen career and placements are arranged in a variety of careers ranging from Medicine and Vet Science to Engineering and Law.

The 14 day programme combines problem based learning lectures at local university, cultural exchange at a local school, training through simulated and real-life situations at various work placement including operation theatre. The student's experience is further enhanced through several excursions including visits to heritage sites, island touring, Orang Utan-Wildlife sites and shopping at the tallest building in the world- Twin Towers.

While participating in all the above, students are contributing to the local community by teaching English at the local orphanage.

It is our belief that raising awareness of cultural issues and broadening the horizons of students in full time education should be a priority. Through the interactive activities that take place, this tour provides students with a unique cultural exchange experience and the opportunity to build genuine friendships in the local communities. It will also provide knowledge of the local history, its customs and traditions.

**Overall, this study tour successfully combines a range of activities, which provide students with a stimulating and educational experience which they will always remember and will give them an insight into their future careers.**

**GOODWILL  
AMBASSADOR  
PROGRAMME**

**Cardiff Sixth Form College  
Goodwill Ambassador Programme**

*Start your career with a little time on the beach!*

Through CSFC Goodwill Ambassador Programme, you will have the opportunity to see what it takes to become a doctor or an engineer at international level. We offer hands-on experience to sixth form students, giving them a real insight in their career choices.

Located in the safe and tranquil region of South East Asia, we strike a unique balance between a challenging curriculum of academic study and off-campus activities which offer a real appreciation for the Asian culture.

Basically, it's medical or veterinary school without the exams.

If you consider yourself a dedicated student, GAP may be just what you need. Our 14 day programme will make you feel like you're on the fast track toward a career of your choice. This trip will help satisfy your curiosity, raise the bar on your education and turn your ordinary summer vacation into the time of your life. What better way to put yourself to the test?

When you are learning about everything from the cardiovascular system to the anatomy of exotic species, it helps to be in an environment that is both professional and makes you feel comfortable. All our work placements are safe and secure, more importantly our provider are keen to ensure that our students gain a real insight to their future careers. Whether your curriculum is pre-medical or pre-engineering, our course will put you right in the middle of the action.

*"I had a truly memorable time. Somehow we managed to learn more about our chosen careers, made friends in the local community and saw some spectacular places all in the same two weeks."*

## *An exciting curriculum... And the ocean!*

We are confident that we have achieved just the right balance between academic study and fantastic extra-curricular activities all based in the tropical climate of South East Asia.

In the capital of Malaysia, Kuala Lumpur you will be able to experience the exciting cultural mix you would expect in a capital city. With luxurious Western shopping malls and local bazaars to explore you will be able to shop and to sample the combination of Chinese and Malay cuisine. There will be the chance to visit the world's tallest buildings (Petronas Towers) and the famous Lagoon Theme Park.

You will also spend time in Kuching which has been described as the "most beautiful city in South East Asia". On non-study days you will be

able to visit Asia's finest living museum in Borneo and hear all about different ethnic customs and traditions. There will also be trips to the fascinating Longhouse community situated in a beautiful rainforest and the famous Orang Utan Rehabilitation Centre.

The delegates of this programme all agree that this trip manages to include something for everyone!

*"I'm so glad that I went. I did things I never thought I could or would do and visited places that I thought I would only see in holiday brochures"*  
Victoria Marchant, 2007 participant.

*Your brain will thank you!*

We have done plenty of homework ourselves. After all, we want to make sure our students make the grade. Well, most students say it is the perfect mix of fresh air, sunshine and formaldehyde.

Our classes go beyond the classroom.

Medical students can experience anything from patient recovery to hands-on training, while veterinary students spend time in veterinary clinics and wildlife centres. There's also the surrounding countryside or the busy bustling town to explore. You will have the chance to visit the Orang Utan Forest Reserve as well as the Cultural Villages, two of the attractions that make South East Asia so fascinating. Enjoy your time here. There is so much to see and do!

*"The field trips and extra activities were even better than I expected, and I'm so glad I had the opportunity to do things I'd otherwise never get to do."*

*Owen Allan David Jones, 2008 participant*

CSFC believes that GAP is an investment in the future of both the individuals who attend the programme, and the communities who will benefit from the education and skills obtained. The College is proud to have provided a unique and powerful experience for all involved.
